### Subject Matter of the Appeal

We wish to appeal the decision of the Minister to apply a variation to licence T12/345A/1 from 3.757 ha to 0.903 ha upon issuing of this licence.

The reasons provided for this variation are;

1. The possibility of interference with the passage of wild fish
2. The variation is in keeping with the policy of evenly distributing the licensed area to all applicants

The subject matter of our appeal relates directly to the reasons cited in support of the variation.

Appellant's particular interest in the outcome of the appeal:	
Appellant is the licence applicant. We employ 20 full time and 40 seasonal people in what is a rural area with little alternative full-time employment. We believe the variation applied to this licence undermines the sustainability of our business.	
Outline the grounds of appeal (and, if necessary, on additional page(s) give full grounds of the appeal and the reasons, considerations and arguments on which they are based):	
<p>The grounds of our appeal relate directly to the reasons cited in support of the variation;</p> <p><b>Issued Raised: Possibility of interference with the passage of wild fish</b></p> <p><b>Our Response: We do not accept that the application for 3.757Ha poses a risk of interference to the passage of wild fish.</b></p> <p>This application is not located near any channels leading to the rivers supporting populations of Migratory fish in the Trawbreaga bay catchment. The rivers highlighted as being of concern by IFI (Donagh and the Glenagannon Rivers) as part of the statutory consultation process are on the other side of the bay. We do acknowledge that there is a small spate river upstream of the application, but we can locate no records of angling activity of fish monitoring associated with this spate river.</p> <p>Trestles are open structure and therefore do not impede passage of migratory fish species. As part of good husbandry and site management we further have breaks between trestle lines and do not permit the build-up of any debris that would block channels as this would reduce water flow and thus the growth of our oysters. We request that ALAB provide a copy of all IFI submissions relating to this licence so that we may further support our appeal.</p> <p><b>Issue Raised: Policy of evenly distributing the licensed area to all applicants</b></p> <p><b>Our Response: We are not made aware at any stage during the application or deliberative process that such a policy exists and if it does exist we do not believe it is being applied in a consistent manner of all aquaculture licence applications</b></p> <p>We are not aware of such a policy and given that many applicants in Donegal and Ireland have received larger licences without reference to such a policy we do not believe the policy is being evenly applied. We are concerned as to the lack of transparency in the decision-making processes in our Bay, which has seen many other licences processed by both by DAFM and ALAB over the last few years which were submitted at the same time as our own. The delay in processing our applications has placed us at a disadvantage in terms of accessing available ground up to the permitted overlap and disturbance thresholds required by Natura 2000. We have had a long correspondence with the Department on this application and this is the first time the apparent conflict with policy has been raised.</p> <p>We request that ALAB provide a copy of this policy document so that we can further support our appeal.</p>
