Extracts from Act

40.—(1) A person aggrieved by a decision of the Minister on an application for an aquaculture licence or by the revocation or amendment of an aquaculture licence may, before the expiration of a period of one month beginning on the date of publication in accordance with this Act of that decision, or the notification to the person of the revocation or amendment, appeal to the Board against the decision, revocation or amendment, by serving on the Board a notice of appeal.

(2) A notice of appeal shall be served—

(a) by sending it by registered post to the Board,

(b) by leaving it at the office of the Board, during normal office hours, with a person who is apparently an employee of the Board, or

(c) by such other means as may be prescribed.

(3) The Board shall not consider an appeal notice of which is received by it later than the expiration of the period referred to in subsection (1).

41.—(1) For an appeal under section 40 to be valid, the notice of appeal shall—

(a) be in writing.

(b) state the name and address of the appellant,

(c) state the subject matter of the appeal,

(d) state the appellant's particular interest in the outcome of the appeal,

(e) state in full the grounds of the appeal and the reasons, considerations and arguments on which they are based, and

(f) be accompanied by such fee, if any, as may be payable in respect of such an appeal in accordance with regulations under section 63, and

shall be accompanied by such documents, particulars or other information relating to the appeal as the appellant considers necessary or appropriate.

Appeals letter for Site Tob/477A.

Dear minister.

This is my Appeals letter concerning my denial to oyster farming on Site Tob 477A. Now the ground in which I have been unsuccessful are as follows Natura 2000. My application was denied due to invasive disturbances on aquatic birds and their habitats. I have no problem with birds they deserve to eat and breathe the same air as a human, but the very fact that access being denied by you and Seil Conservation activists on the grounds of Seil, Could potentially disrupt the habitat of the birds, Could potentially disrupt the way birds walk in and around tressels, Could potentially frighten the birds if Seil person, for a few hours a day be visible to be working and earning a living. Meaning the birds won't visit the site where activity is seen. Birds are very clever, yes they will not endanger themselves where humans are visibly seen. This is just the same as telling a swimmer, sorry you can't swim here it's protected by Seil Conservation.

and by you swimming in the area you will disrupt the birds. oysters are known for purifying waters, taking the CO_2 gasses out of the air, where we as a nation have already damaged by means of emissions in the air. If granted I will also be creating employment for those who need it and creating revenue to Ireland to help the Country back to its original path. My great grandfather, my grandfather even my father before me were and are all fishermen that's all they knew coming from a small village by the sea, our land borders the site I am applying for, they have fished these waters for years, they at the time didn't have the resources to become oyster farmers in an ever growing industry but I hope I can carry on a legacy and provide employment to local people and not let a trade die out. I will be using this site for the start of the growing process from April to September, tressels will be moved off the site for the winter. I will monitor the situation around the area to ensure nothing will be out of place, tressel will be maintained, Research into possible better ways of looking provided to grow these oysters. I would like the chance to see for myself the impacts I may have better off more than I can show in applying for such area's and hectares, but I'm willing to compromise for the better
