To whom it may concern,

Yours sincerely, Paul Bradley

Chairman (LSWOSL)

Please find attached the sworn statements from some of the many local native oyster fishermen that are licensed under Inland Fisheries Ireland:

"I would like to state that as a fisherman, I have fished the areas around Lough Swilly for several years during the years of 2004, 2005 and 2006. I do recall seeing Lough Swilly shellfish growers Co op Ltd operate an aquaculture business with a dredge vessel operating collecting and distributing shellfish in the waters around Inch Island areas:T12/37A T12/37B T12/37C

This is my sworn statement and I would be willing to challenge any contradictory information that suggests otherwise."

Please find attached names of fishermen:

2nd January 2018

To whom it may concern,

Please find attached sworn statements from some of the many fishermen that currently fish for native oysters (ostrea edulis) in the following areas :

T12/37B2 Millbay, Farland Channel area, T12/37A1 Fahan creek, Fahan channel area and T12/37C Inch Flat area.

These local fishermen have given their sworn testaments to state that these are native oyster areas, where they have fished for native oysters (ostrea edulis) for many years and would be willing to challenge any contradictory information that suggests otherwise.

Furthermore, they would like to strongly support the plan of the above areas becoming nursery areas. This will protect our native oyster (ostrea edulis). The serious problem of pacific oysters in Lough Swilly has infested most of our native oyster areas. The areas of Millbay, Farland Channel, Fahan Creek, Fahan channel and Inch Flat are the least infected and this in our view, is the last chance of survival for our natural native oyster fishery before it becomes extinct.

Please find attached names of fishermen:
